## GRENACHE

This wine is produced from Grenache grapes grown on 15 to 20-year-old vines planted on clay limestone soils in the South of France. Grenache is a grape variety which gives the best of itself when it grows in arid regions. The climate in this region is hot, dry, and very sunny. Rose in color, this is a well-balanced, fresh, and round wine offering plenty of fruity aromas and a full finish. Enjoy as an aperitif or with barbecues, salads, and pizza.
